

NORDIC STEEL THERMAL BOTTLE, 500ML.

HBN01-RE

The Nordic thermal bottle is a great choice for sports, hiking and everyday use. It has a vacuum insulated double wall that protects the temperature of the drink and also prevents the product from heating up. Cold drinks maintain their temperature for up to 12 hours, hot drinks for up to 6 hours. Made of the highest quality 18/8 food steel which is resistant to acids and carbonates. The bottle does not affect the taste of the drink nor does it smell after using. A wider opening allows you to put ice cubes inside, it also makes the bottle easier to wash. The outer layer of the product is finished with powder coating which ensures a safe grip. Leakproof design. Product certified for contact with food.
