

NORDIC THERMAL MUG, 650 ML

HBTN01-NB

The Nordic steel vacuum water bottle is made of the highest quality 18/8 stainless steel, resistant to acids and carbonates. The solid finish prevents any mechanical damage. Double walls provide excellent insulating properties (cold temperature for up to 12 hours and hot temperature for up to 6 hours). The outer layer of the product is finished with powder coating which ensures a safe grip and great looks. With two replaceable lids, you can change the purpose of the bottle and use it either as a thermos or a sports bottle (a screw cap with a handle, made of BPA-free polypropylene, and a steel cap with a wide opening).

Product certified for contact with food.
